The second last sale of the 2025 winter selling season performed as expected. This sale has earned a strong reputation over the years because many of the top clips in the country are sold through it. The only negative on the sale was the downward pressure on the 31-micron and 32-micron group. This is also the micron group that benefited the most this season in the better sale prices, so it was not the end of the world. The clip of Jordi van Hasselt deserves a special mention. No clip can beat it in quality. His best bale sold for R898.00/kg. Then there was the top winter kid bale of Daan and Phillip Schutte that was sold for R910.10/kg! This super style, B-length bale of 24-micron, was really something special. Then Frans Retief of Driehoeksfontein, Murraysburg, sold his 24.8-micron bale with a clean yield of 94.1% at R901.00/kg! Then the clip of the CF Conradie Trust from Murraysburg also deserves a special mention. His total clip average was just short of the R500.00/kg mark. Congratulations to everybody. The last sale before the Christmas break will be held on the 9th of December 2025. This sale will be substantially smaller. It is anticipated that prices will remain at their current levels.
