Today we had our fourth sale of the winter season. As expected, the market came under pressure, particularly in the stronger microns. However, what we did not expect was the downward movement across all age groups, especially in the 26–28 micron groups. This was mainly due to reduced interest from the Eastern markets. At the previous sale, these markets showed greater interest in these micron groups, which contributed to the change in prices today. On a positive note, special congratulations to Bernard and Johannes Delpot, who achieved an excellent price for a Super Style Kid bale with a micron of 25.2 and a clean yield of 92.2%. This is an outstanding result. Our next sale will take place on 10 November.
