The HF marketing team is relieved and satisfied with the result of the fourth mohair sale of the 2025 summer selling season. The HF market indicator increased by 1%, but in real terms, the market dropped by 3% because the Rand devalued against the USD by 4%. That is the price the South African mohair industry must pay, caused by the levies the USA installed on the countries that import Cape mohair to manufacture high-end products. Remarkably like the uncertainty of the COVID time, mohair showed resilience again in crisis times. HF congratulates Boet Greeff from Somerset East with the seasonal record price of R788/kg for his best bale of summer kids. This super-style bale of 23.6 microns, with a clean yield of 90.6% was the showpiece of the sale. The next sale is only in 4 weeks' time, due to all the public holidays in the Easter recess. The next sale, scheduled for the 13th of May 2025, is expected to be another big sale but with excellent quality on offer.
