6. Connacher	0.4%

The fifth mohair sale of the 2024 summer selling season came with a bit of a shock! The downward trend of 6% was not expected. The marketing team only allowed a drop of 5% on the RMS lots. This helped a lot, because the market stabilizes at a drop of 4%, except for fine young goats between thirty-one microns and twenty-eight microns. There was no demand for these types. The same trend as a year ago. It bothered HF from the start of this recovery this season that it was just the two processors that were buying. This phenomenon caught up with us today. The production increased because of the good grazing the past year with a good kidding percentage. The highlight of the day was when the good style bale of Sean Hobson of the well-known farm Matrysford, Jansenville sold for R850.00/kg! It was a 22-micron bale with an 87% clean yield. The next sale will be in two weeks, selling on the 14th of May in the PE Mohair Exchange. The quality offered will rank as one of the best-quality auctions ever!
